

8/29 Response:

$$x(t) = u(t)$$

$y(t)$:

Impulse Response:

$$x(t) = \delta(t)$$

system:

$u(t) = \text{impulse}$

$x'(t) = y'(t)$ b/c linear system

since $\delta(t) = \frac{d}{dt} u(t)$ ↖ measure step response
 then numerically derivatinate $u(t)$
